

AML's quality accessories make your work experience more efficient and productive. AML offers a full range of M5900 terminal accessories to complement your data collection application and work environment – from single user, to enterprise-wide installations.

Terminal Charger (Single Slot Charging & Communications Cradle)

AML's terminal charger enables serial or USB (slave) communication between the M5900 and a host PC. The terminal charger charges the M5900 terminal battery and includes an extra slot for charging a spare battery. Dual color LED lights indicate when the terminal and spare battery are fully charged. The terminal charger accommodates the M5900 with or without the pistol grip handle. Includes external power-pack and line cord. (Part number: ACC-5925)

In-Line Charger

The M5910 In-Line Charger charges the M5900 portable data terminal and has a built-in null-modem adapter that allows RS232 serial communication. Includes external power pack and RS232 cable. (Part Number: ACC-5910)

Modem Terminal Charger (Single Slot Charging & Communications Cradle)

The AML ACC-5940 Single Slot Modem Terminal Charger offers an internal 33.6 kBaud, Hayes™ compatible modem for data communications over a standard, dial-up telephone line. The ACC-5940 also includes a full-speed USB (Type II) communications port that can be used to transmit data files to and from the M5900 Series PDT, or to load a new or updated operating system into the terminal. The ACC-5940 Modem Terminal Charger charges any AML M5900 Series Portable Data Terminal and one spare battery. Includes an external power-pack and line cord. Available for shipment in North America only. (Part Number: ACC-5940)

Four Position Terminal Charger

The four position terminal charger for the M5900 will simultaneously charge the internal batteries in four (4) M5900 terminals. Typical charge time is 4 hours. Dual color LED's provide charging status. One position of the charger also accommodates communications to the M5900 utilizing "pass through" RS-232 and USB ports. The four position charger is enclosed in a rugged metal housing and comes complete with external power-pack and line cord. (Part Number: ACC-5935)

Four Position Battery Charger

The four position battery charger for the M5900 terminal will simultaneously charge four (4) M5900 batteries. Typical charge time is under 2 hours (half the time of the standard charger). Dual color LED's provide charging status. Featuring a rugged metal housing for added durability, the four position battery charger comes complete with external power supply and line cord. (Part Number: ACC-7037)

Multiple Holsters

AML offers two styles of nylon holsters that provide added protection for the M5900 wireless terminal. Each holster comes with an adjustable belt and secures the M5900 terminal comfortably on the user's hip for easy terminal accessibility. (Part numbers: CAS-7101B and CAS-7101H)

Pistol Grip Handle

The M5900 pistol grip handle is designed to accommodate users who prefer the point and shoot style of scanning. Installation is quick and easy. The pistol grip handle secures to the M5900 terminal with four screws and the battery is then relocated inside the pistol grip handle for easy change-out. (Part Number: ACC-5HND)
